

# Physician and Non-Physician Specialty/Rating Classification Codes

## Non-Physician Rating Codes

These rating codes should be used by authorized providers when submitting medical bills/reports. For more information on CMS-1500 requirements, see the [CMS-1500 Overview](#) page.

## Physician Specialty Classification Codes

The "C" rating (Certified in Specialty, e.g., CS - Certified -Surgery) may be granted to physicians certified as specialists by a board recognized by the American Board of Medical Specialties or the American Osteopathic Association. Applicants who are qualified but have not attained board-certified status as defined above, will be granted a specialty rating without the "C" prefix (e.g., IM, OS, S, etc.).

The "OP" designation, when combined with one of the specialty ratings, indicates that the specialist is an osteopathic physician (e.g., "OPOS", is the proper rating for an osteopathic physician who is a qualified specialist in Orthopedic Surgery. Upon obtaining Certified status, as defined above, a physician may apply for an "OPCOS" rating).
